

Waterborne & UV Curable
Solutions Since 1991

Performance Finishes by Van Technologies, Inc.

Waterborne Coatings & UV Curable Coatings

The ASAC™ Advantage Application Specific Advanced Coating Technology
Unique formulations that are designed specifically for your product, process, performance
criteria & appearance.

Low to Zero Volatile Organic Compound (VOC) emissions
and Hazardous Air Pollutants (HAPS)

Consistent & Predictable Finishes Qualified &
Confirmed with Every Order

Custom Formulations that Provide Savings Beyond Materials
Increased Manufacturing Efficiencies, Reduced Downtime and Low Reject
Ratios for Improved Performance & Value

Experienced Field Technical Support
Consultative service and training that maximizes your process
potential and provides the Best Finish in the Industry!

Superior Service

Every facet of our company including sales and administrative,
manufacturing and shipping, field and laboratory personnel are
driven to be accurate, timely and responsive to your business
and production needs. It takes great teamwork to make a
great finish!

Custom Color Matching also available

One-of-a-Kind Finishes.
Not one size fits all.

Formulations are customized to your specific needs:

- 3-Coat System: The base coat seals the wood to protect it from harmful UV rays and damage from moisture. The base coat not only promotes dimensional stability, it also provides an excellent surface for top coat applications. Then apply two layers of the topcoat to fortify the UV resistance and to obtain the final desired color.
- Time tested & proven, offering years of maintenance free performance that provides a finish that stays "looking new"
- Pseudo-Elastic Properties that expand and contract naturally with the wood to prevent any cracking, peeling and flaking of the finish
- No chalking or fading - this finish protects from UV damage preventing the onset of a degraded finish
- Proven Performance- extensive laboratory and field application testing by independent sources recognizes the Rustic System as having the **BEST WEATHERING CHARACTERISTICS** of any finish in its class!
